

**Resolution of the Texas Geographic Information Council for
Membership in the Texas Federal Geographic Information Workgroup**

May 13, 1999

WHEREAS, a principal charge of the Texas Geographic Information Council (TGIC) is the coordination of geographic information systems, cartographic standards, and geospatial data development for the State of Texas and its local and regional governments.

WHEREAS, a principal charge of Texas Federal Geographic Information Workgroup (TFGIW) is the coordination of geographic information systems, cartographic standards, and geospatial data development for federal agencies with operations in the State of Texas.

WHEREAS, both the TGIC and the TFGIW have common and overlapping interests that can be better served and coordinated through the exchange of information by mutual membership and participation on each other's respective organization.

THEREFORE BE IT RESOLVED that the Texas Geographic Information Council hereby accepts membership to the Texas Federal Geographic Information Workgroup.

BE IT ALSO RESOLVED, that each group will encourage the free exchange of ideas; through open meetings and dialog; by designating their respective chairperson(s) as their official representatives; regular reporting of activities from quarterly meetings; and the development of projects that are of mutual interest.
